You can sell the final result of your amigurumi in any way you prefer. If you decide to sell your finished item online, please include a link to our website in the description. This way, you will also be supporting our project.

Important Note:

This amigurumi is worked with tight V-shaped and spiral stitches. Do not close off each row unless indicated; make sure to always mark the beginning of each row. Please read the entire pattern before starting. We have a tutorial on our channel to make this amigurumi. You can access the links attached to each image if you have any questions. If you find any errors in this pattern, please contact me.

This amigurumi is approximately 25cm tall, and you can articulate its body. This amigurumi stands on its own.

Important Note:

This pattern can be adapted to create amigurumi of different sizes using yarn of different thicknesses. Adjust the hook size according to the thickness of the yarn selected. Also consider the size of the safety eyes if you decide to use them.

I hope you enjoy designing this pattern for yourself as much as I did.

Materials:

- 100% Mercerized Cotton thread (Sinfonia brand), average thickness approximately 3mm. Colors: Lilac, purple, white and black with 2.5 mm hook
- 100% Mercerized Cotton thread (Eulali brand), average thickness approximately 1mm. Colors: mango and Mexican pink with 1.5 mm hook
- 10mm safety eyes and black felt.
- Black sewing thread for embroidering details on the face
- Old Rose embroidery thread number 3088 (129) for more details on the face.
- Wire to articulate the amigurumi (I used 4 pipe cleaners)
- Wool needle
- Scissors
- Time marker
- Pins
- Stuffing for amigurumis
- Silicone glue (to melt on the base of the body and joints)

R14-19: 8sc

Cut the thread leaving a long section to make a perfect closure with the help of a wool needle. This will make it easier to join it to the body later.

The perfect cast off is done with a tapestry needle. After cutting and pulling out the yarn, skip a stitch and pass the needle under the next chain. Then, insert the needle again into the last single crochet you made. For greater clarity, I invite you to watch the video just once and you will understand it easily. Every time you make a perfect cast off, you will follow this same process.

Sleeve flounce

Use purple thread.
Work in the front strands that we have left free in R11.
Start with 2ch, in the same strand start 4dc, work 4dc in each strand that we have left free, then close with 1sss.
When finished, cut the thread, leaving enough thread to make a perfect closure.

Fingers

Use white thread
3ch, BLO 2ss, 1ss between R1 and 2, (4ch, BLO 3ss, 1ss more in the next stitch embracing the entire R1)x4

When you finish the second finger, make the slip stitch at the same base where you made the slip stitch of the first finger. Similarly, the slip stitch of the fourth finger should be made at the base of the third finger. This is necessary due to the limited number of stitches. If you find it necessary, you can refer to the video for more clarity.

At the end of round 10, remove the marker (if you are using a thread like I did). Place the base on a flat surface, as this is the time to apply hot glue to the base. Make sure to heat the glue gun well, allowing the glue to spread itself. Let it cool without moving it from the surface, and wait long enough until it is completely cold and hard. This will create a flat base that will provide ideal support for the amigurumi to stand on its own. If you prefer, you can replace the glue with plastic; I just don't recommend cardboard, as if the amigurumi gets wet in the future, it could lose its shape.

Between the ruffle we have made and round 49 of the body, we will use lilac thread to make slip stitches, which will add a unique finish. Finally, make a perfect closure.

Before continuing, it's time to prepare the pipe cleaners: one for each arm, bent, and two for the center of the body or whatever wire you prefer, leaving some extra to join them together in the neck area. Using pipe cleaners can be a bit tricky because of their fragility, but if you use another type of wire in the narrower areas of the arms, it will be much easier to insert them. For this same reason, in the center of the body I used an additional stick just to make insertion easier, which I removed later. Once the pipe cleaners are in place, it is necessary to stuff the body both in front of and behind the wires. The arms do not need stuffing, but if you want to add some, you can do so.

When using pipe cleaners, the wool covering the wire is sufficient as filler in the neck area. However, if you use another type of wire, be sure to fill well around the wire in the neck area to get a firm finish.

Prepare the 10mm safety eyes. First, take some black felt and make a small hole in the center. Insert the safety eye through the hole, then, using scissors, trim the felt around the eye, leaving about 2-3mm of space around it. Repeat the process to prepare both eyes.

Use pins to position the safety eyes. Place them between rounds 65 and 66, leaving about 10 stitches of space between them. It is important to check this spacing carefully before attaching the eyes, as once placed, they will cover several stitches around them.
https://youtu.be/s8kLvgGjkPg?t=914

Between rows 61 and 62, place the pins to mark the position of the mouth, leaving a gap of 4 stitches. For a better understanding of this step, I recommend watching the video tutorial.

Embroider these details using black sewing thread and a sewing needle.
https://youtu.be/s8kLvgGjkPg?t=1024

Embroider the nose just above round 64, forming a triangle as centered as possible in relation to the mouth.

This last stitch at the bottom of the nose will give it a nicer finish. Continue embroidering as many stitches as necessary to shape the nose.

For the rest of the embroidered details, such as the eyebrows and the marks under the mouth, if the pictures are not enough, I recommend watching the video, where you can follow each stitch in detail. For the embroidery in old rose, use all the strands of the embroidery thread.

To attach the hair to the head, I'll be using silicone glue, but if you prefer to sew it for extra security, you can do so without any problem. First, line up the center of the back of the head with the center of the magic ring we made at the beginning of the hair. Then, start attaching the back strands, making sure to cover everything well with white thread. On the front, I've left nine strands, separating 4 to one side and 5 to the other. If you have 8 strands left, that would be ideal, but remember that the hair doesn't need to be perfect.

The most important thing is that you don't cover too much of the details of the face. If this explanation and the pictures are not enough, I recommend watching the video in which we show you how to put all the hair in place step by step and without cutting. Use pins to arrange all the hair in place before fixing it. Then, you can attach it using silicone glue or stitching, depending on your preference.

We will attach all the smaller flowers to the top of the hat and the remaining ones to the dress. The two medium flowers will go on each side of the face, and the feathers will also be placed on the hat. To attach all these details, we will first use pins to position them as you like, and then we will fix them with glue. Pay attention to the pictures and, if necessary, check out the video. Remember that you can also place the decorations according to your own taste. For a better understanding, I suggest you watch the video we have shared, where the process is shown in detail.
